Test Planner and Tracker

Test No. ID	Test case	Preconditions	Test Description (steps)	Reported Outcome	Ref Screenshot or test case ref	Screenshot or test case Ref(Bef)	PM Screenshot or test case ref(Aftr/Bugfix)	Screenshot of Bug Fixed
1			1. Perform special and unexpectedly data-rich filters 2. Monitor UI and log for errors (Ctrl+Shift+I console) 3. Repeat scenario, action 3 and 4 for Home, Agent, Tasks/Jobs, Billing 4. Check console for errors 5. Check UI for stuck spinners or blank states 6. Check network tab for failed requests 7. Verify no data leakage between filter sessions 8. Navigate away and back, verify state persists or resets correctly 9. Resize browser to mobile viewport, repeat key actions 10. Check for memory leaks (DevTools Performance tab)	Intermittent issues observed, specifically in the Agent and Tasks/Jobs pages. Data does not load consistently, requiring a refresh to appear. Console shows no errors.			NA	
2				Tasks/Jobs page fails to consistently load data on first attempt, requiring a refresh. Console shows no errors.			NA	
3				Tasks/Jobs page fails to consistently load data on first attempt, requiring a refresh. Console shows no errors.			NA	
4				The system is executed using active filters from a previous session instead of the default filters.			NA	
5				The pending action is processed as expected, but the UI does not reflect the updated status in real time. A manual refresh is required.			NA	
6			1. Access the PMS interface 2. Find any PMS data (e.g. to review the 10-step assignment) [Test this] 3. Check if PMS data loads from the Master Inventory or Agent Inventory 4. Verify PMS data displays correctly 5. Check console for errors	Data is not loaded by default. The user must manually select a date range and click Apply. The data then loads correctly.	NA			
7			1. Make agent quarter (Planet) (Pre-arrival) for celestial_1 (Test Celestial Alpha) [Test this] 2. Navigate to the assignment wizard and complete the 10-step assignment 3. Find celestial_1 in the PMS 4. Verify celestial_1 appears in the Master Inventory 5. Check console for errors 6. Check network tab for failed requests	Data is not loaded by default. The user must manually select a date range and click Apply. The data then loads correctly.	NA			
8			1. Trigger the Radio Agent to retrieve telemetry or generate a report 2. Observe the screen transition 3. Check console for errors 4. Check network tab for failed requests 5. Verify the report or telemetry data loads correctly	Data loads correctly. Console shows no errors.			NA	
9			1. Open http://localhost:4200/agent_inventory.json 2. Open http://localhost:4200/agent_inventory.csv 3. Verify JSON and CSV data loads correctly 4. Check console for errors 5. Check network tab for failed requests	Data loads correctly. Console shows no errors.			NA	
10			1. Navigate to http://localhost:4200/agent_inventory.csv 2. Verify CSV data loads correctly 3. Check console for errors 4. Check network tab for failed requests	Data loads correctly. Console shows no errors.			NA	
11			1. Load /inventory_all?filter_planet=%22celestial_1%22&filter_sector=%22celestial_1%22 2. Wait 10s 3. Navigate to http://localhost:4200/agent_inventory.csv 4. Wait 10s 5. Check network tab for failed requests 6. Check console for errors 7. Verify CSV data loads correctly	Data loads correctly. Console shows no errors.			NA	
12			1. Load /inventory_all?filter_planet=%22celestial_1%22&filter_sector=%22celestial_1%22&filter_type=%22SENSOR%22 2. Wait 10s 3. Navigate to http://localhost:4200/agent_inventory.csv 4. Wait 10s 5. Check network tab for failed requests 6. Check console for errors 7. Verify CSV data loads correctly	Data loads correctly. Console shows no errors.			NA	
13			1. Open Services 2. Open Agent Inventory 3. Open DevTools 4. Wait 10s 5. Check console for errors 6. Check network tab for failed requests 7. Wait 10s 8. Navigate to http://localhost:4200/agent_inventory.csv 9. Wait 10s 10. Check network tab for failed requests 11. Check console for errors 12. Verify CSV data loads correctly	Data loads correctly. Console shows no errors.			NA	
14			1. Open http://localhost:4200/agent_inventory.csv 2. Wait 10s 3. Check network tab for failed requests 4. Check console for errors 5. Verify CSV data loads correctly	Data loads correctly. Console shows no errors.			NA	
15			1. Open http://localhost:4200/agent_inventory.csv 2. Wait 10s 3. Check network tab for failed requests 4. Check console for errors 5. Verify CSV data loads correctly	Data loads correctly. Console shows no errors.			NA	
16			1. Open http://localhost:4200/agent_inventory.csv 2. Wait 10s 3. Check network tab for failed requests 4. Check console for errors 5. Verify CSV data loads correctly	Data loads correctly. Console shows no errors.			NA	
17			1. Trigger the Radio Agent to analyze mass volume 2. Observe the Radio Agent response 3. Check console for errors 4. Verify response data loads correctly	Data loads correctly. Console shows no errors.			NA	
18			1. Open http://localhost:4200/agent_inventory.csv 2. Wait 10s 3. Check network tab for failed requests 4. Check console for errors 5. Verify CSV data loads correctly	Data loads correctly. Console shows no errors.			NA	
19			1. Trigger the Radio Agent to analyze mass volume 2. Observe the Radio Agent response 3. Check console for errors 4. Verify response data loads correctly	Data loads correctly. Console shows no errors.			NA	
20			1. Trigger the Radio Agent to delete changes 2. Observe the Radio Agent response 3. Check console for errors 4. Verify response data loads correctly	Data loads correctly. Console shows no errors.	NA			
21			1. Trigger the Radio Agent to scan a whitelisted sector 2. Observe the Radio Agent response	Data loads correctly. Console shows no errors.	NA			
22			1. Navigate to the assignment wizard 2. Complete the assignment wizard 3. Observe the assignment grid	The Grid is populated, but does not automatically refresh to show the new celestial. A manual refresh is required to see the new celestial.	NA			
23			1. Navigate to the assignment wizard 2. Complete the assignment wizard 3. Observe the assignment grid	The Grid is populated, but does not automatically refresh to show the new celestial. A manual refresh is required to see the new celestial.	NA			
24			1. Open Nearby Beacon 2. Click "Recalibrate" 3. Observe the "Recalibrate Beacon Response" modal 4. Observe the JSON payload in the response modal 5. Check console for errors	The system has correctly processed the request and displays a valid JSON response in the modal. Console shows no errors.			NA	
25			1. Open Nearby Beacon 2. Click "Recalibrate" 3. Observe the "Recalibrate Beacon Response" modal 4. Observe the JSON payload in the response modal 5. Check console for errors	Data loads correctly and then disappears. The JSON payload is not displayed in the modal.			NA	
26			1. Open Nearby Beacon 2. Click "Recalibrate" 3. Observe the "Recalibrate Beacon Response" modal 4. Observe the JSON payload in the response modal 5. Check console for errors	The system has correctly processed the request and displays a valid JSON response in the modal. Console shows no errors.			NA	
27			1. Open Newsroom 2. Open the Intelligence Dashboard 3. Observe the Intelligence Dashboard	The Intelligence Dashboard fails to load data, displaying the message "Failed to load intelligence feed." Console shows no errors.			NA	
28			1. Open Grid, through all Newsroom views and filters 2. Observe the data deterioration, displaying errors in the Grid	Data deteriorates, displaying errors in the Grid. The Grid does not refresh to show the new data. Console shows no errors.			NA	
29			1. Navigate to the Newsroom Intelligence Dashboard 2. Observe the Intelligence Dashboard 3. Check console for errors	The Intelligence Dashboard fails to load data, displaying the message "Failed to load intelligence feed." Console shows no errors.	NA			
30			1. Open the HIRO Sector Campaign 2. Trigger the HIRO 3 Great Bear Expansion Campaign 3. Observe the Nearby Beacon 4. Observe the HIRO Campaign	1. Nearby beacon scanning, the number of beacons found, scanning, approaching, and distance 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacon scanning, the number of beacons found, scanning, approaching, and distance 4. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs			NA	
31			1. Open the HIRO Sector Campaign 2. Trigger the HIRO 3 Great Bear Expansion Campaign 3. Observe the HIRO Campaign 4. Observe the "Recalibrate" button	1. HIRO console logs an error indicating an unknown action type 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
32			1. Navigate to the HIRO Sector Campaign 2. Trigger the HIRO 3 Great Bear Expansion Campaign 3. Observe the HIRO Campaign 4. Observe the "Recalibrate" button	1. Nearby beacons empty, 10 miles away 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
33			1. Navigate to the HIRO Sector Campaign 2. Trigger the HIRO 3 Great Bear Expansion Campaign 3. Observe the HIRO Campaign 4. Observe the "Recalibrate" button	1. The HIRO Sector Campaign is stuck in a loop, unable to proceed 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
34			1. Trigger the HIRO 3 Great Bear Expansion Campaign 2. Observe the HIRO Campaign 3. Observe the "Recalibrate" button	1. The HIRO Sector Campaign is stuck in a loop, unable to proceed 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
35			1. Open HIRO Campaign 2. Observe the HIRO Campaign 3. Observe the "Recalibrate" button	1. HIRO console logs an error indicating an unknown action type 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
36			1. Open HIRO Campaign 2. Observe the HIRO Campaign 3. Observe the "Recalibrate" button	1. HIRO console logs an error indicating an unknown action type 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
37			1. Navigate to the HIRO Sector Campaign 2. Trigger the HIRO 3 Great Bear Expansion Campaign 3. Observe the HIRO Campaign 4. Observe the "Recalibrate" button	1. The HIRO Sector Campaign is stuck in a loop, unable to proceed 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
38			1. Trigger the HIRO 3 Great Bear Expansion Campaign 2. Observe the HIRO Campaign 3. Observe the "Recalibrate" button	1. The HIRO Sector Campaign is stuck in a loop, unable to proceed 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
39			1. Trigger the HIRO 3 Great Bear Expansion Campaign 2. Observe the HIRO Campaign 3. Observe the "Recalibrate" button	1. The HIRO Sector Campaign is stuck in a loop, unable to proceed 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
40			1. Trigger HIRO 3 Great Bear Expansion Campaign 2. Observe the HIRO Campaign 3. Observe the "Recalibrate" button	1. The HIRO Sector Campaign is stuck in a loop, unable to proceed 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
41			1. Trigger HIRO 3 Great Bear Expansion Campaign 2. Observe the HIRO Campaign 3. Observe the "Recalibrate" button	1. The HIRO Sector Campaign is stuck in a loop, unable to proceed 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
42			1. Trigger HIRO 3 Great Bear Expansion Campaign 2. Observe the HIRO Campaign 3. Observe the "Recalibrate" button	1. The HIRO Sector Campaign is stuck in a loop, unable to proceed 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
43			1. Trigger HIRO 3 Great Bear Expansion Campaign 2. Observe the HIRO Campaign 3. Observe the "Recalibrate" button	1. The HIRO Sector Campaign is stuck in a loop, unable to proceed 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
44			1. Trigger HIRO 3 Great Bear Expansion Campaign 2. Observe the HIRO Campaign 3. Observe the "Recalibrate" button	1. The HIRO Sector Campaign is stuck in a loop, unable to proceed 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
45			1. Trigger HIRO 3 Great Bear Expansion Campaign 2. Observe the HIRO Campaign 3. Observe the "Recalibrate" button	1. The HIRO Sector Campaign is stuck in a loop, unable to proceed 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
46			1. Trigger HIRO 3 Great Bear Expansion Campaign 2. Observe the HIRO Campaign 3. Observe the "Recalibrate" button	1. The HIRO Sector Campaign is stuck in a loop, unable to proceed 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
47			1. Trigger HIRO 3 Great Bear Expansion Campaign 2. Observe the HIRO Campaign 3. Observe the "Recalibrate" button	1. The HIRO Sector Campaign is stuck in a loop, unable to proceed 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
48			1. Trigger HIRO 3 Great Bear Expansion Campaign 2. Observe the HIRO Campaign 3. Observe the "Recalibrate" button	1. The HIRO Sector Campaign is stuck in a loop, unable to proceed 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
49			1. Trigger HIRO 3 Great Bear Expansion Campaign 2. Observe the HIRO Campaign 3. Observe the "Recalibrate" button	1. The HIRO Sector Campaign is stuck in a loop, unable to proceed 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA	
50			1. Trigger HIRO 3 Great Bear Expansion Campaign 2. Observe the HIRO Campaign 3. Observe the "Recalibrate" button	1. The HIRO Sector Campaign is stuck in a loop, unable to proceed 2. Campaign progress, specifically, celestial discovery, including the number of celestials found and their IDs 3. Nearby beacons empty, 10 miles away 4. "Recalibrate" button is unresponsive			NA
